

RFQ 2016-06 Recreation Master Planning Services

Addendum #4

9/12/19

1. Maintenance Program – Is this general maintenance recommendations as it relates to possible improvements and/or renovations, or a detailed maintenance plan for each park and facility?
Any needed general maintenance recommendations based on current conditions and any existing deferred maintenance.
2. Public bathrooms recommendations and designs – we typically provide locations for these in our parks with building footprints and per SF cost estimates at this stage, but not architectural designs. Is this approach ok or do you want building architectural designs too? **We do not need building architectural designs although you could bid it as an alternative. We are looking for conceptual plans at this point.**
3. Mission, Vision and Policy recommendations – Is this general recommendations based on the public opinion survey and public meetings? **Yes. Base off public opinion survey/ public meetings in addition to industry standards and staff input.**
4. ADA and safety compliance and recommendations – Is this primarily focused on playgrounds or are there other facilities that need this review? **This would extend to all applicable locations listed in the scope.**
