

ADDENDUM #3

RFQ 2019-07 PROFESSIONAL ENGINEERING STORMWATER MANAGEMENT SERVICES ON AN “AS NEEDED” BASIS

1. The RFQ references “rate studies” on page 6? Does this refer to establishing/ examining stormwater fees or water and sewer rate studies? This would guide us on the appropriate resumes to show.  
The Town may be interested in stormwater fees at some point in the future but this will not be the emphasis of the experience we are looking at. Town Council desires to solve problems and not invest the limited funds we have on studies. We do realize that stormwater fees may be a means to an end and if a firm desires they can discuss this in their approach.
2. Three projects are requested. Is it ok to submit additional projects in a separate section?  
Limit the submittal to three projects.
