

Town of Edisto Beach

2017 Legislative Initiatives

State Accommodations Tax

The Town of Edisto Beach is unique that it is the only coastal community not exempted as an area of high tourism (receives greater than \$900,000 in ATAX) and therefore falls under the Tourism Expenditure Review Committee review. The Town of Edisto Beach would like legislation passed to provide all the same allowances as those communities that are in areas of high tourism and be exempted from TERC oversight.

Beach Nourishment

The Town of Edisto Beach would like for the State to consider a permanent funding source for beach nourishment. Coastal communities contribute millions of dollars of tourism revenue to the State and maintaining the State's beaches is critical.

Flexible Permitting

The Town of Edisto Beach recommends there be a less restrictive permitting requirement for beach nourishment which would allow a flexible construction window so contractors can perform the work during less busy times providing a cost savings to both parties as long as precautions are taken to ensure environmental issues are addressed.

Local Government Fund

The Town of Edisto Beach promotes fully funding the local government fund according to state statute. This past year the LGF was only funded at 74% and since 2009, the General Assembly has not fully funded the LGF.
