CHROMALOX

The image shows a collection of industrial components on a wooden pallet. In the center is a grey electric motor with a black top and a circular cooling fan on the front. It is flanked by two large yellow cast-iron components, likely pump housings or motor bases, which are also wrapped in clear plastic. Several other smaller yellow components are visible, some wrapped in plastic and others in bubble wrap. The entire assembly is held together by two black ratchet straps. The pallet is made of light-colored wood and sits on a concrete floor. In the background, there are stacks of cardboard boxes and a wooden frame structure.

A small white tag is attached to the wooden frame on the left side of the pallet.
